

All of the photographs in this report were taken by Robert Del Tredici, except for those on pages 3, 6, 7 (bottom), 39, 42, D-3, D-7 and E-2 (bottom).

Photographs on pages vi (top) and 16 (top) are from *At Work in the Fields of the Bomb* by Robert Del Tredici and are copyrighted by Robert Del Tredici. These photographs are used here by special arrangement with the photographer, as are the Del Tredici photos on page 23 (top), 35 (bottom), 38, 47 and E-2 (top).

*Back Cover Photos:*

**Preparation for Entombment**, see caption on page vi.

**Maintenance of Uranium Hexafluoride Cylinders**, see caption on page 51.

**Granite Marker, Plot M**, see caption on page 47.

“How do we ensure effective long-term stewardship of sites with residual waste and contamination?”

This question has technical, financial, cultural, and institutional elements. We cannot today provide complete answers to it. But, as we complete cleanup operations and dispose of waste, we will need to work together on individual, state, and national levels to address this question.

### Chapter 3, *Planning for Long-Term Stewardship*

*This report examines the transition from the cleanup to the long-term stewardship of contaminated facilities and radioactive materials resulting from nuclear research and nuclear weapons production over the past 50 years.*
